EMA Radar™ for  
Privileged Access  
Management

As organizations continue their digital transformations and move to the cloud, they face increasingly complex environments and an expanding number of identities. This can lead to more challenging privileged access requirements for securing an expanded threat landscape. Privileged Access Management (PAM) is complex, but the solution doesn't have to be. At Delinea we believe the opposite of complex isn't simple – it's seamless.

Delinea is a leading provider of solutions that seamlessly extend Privileged Access Management for the modern, hybrid enterprise. We believe every user should be treated like a privileged user and wants seamless, secure access, even as administrators want privileged access controls without excess complexity. Our solutions put privileged access at the center of cybersecurity strategies by defining the boundaries of access. With Delinea, privileged access is more accessible.

### ✓ A partner for extended privileged access controls

Digital transformation, the cloud, and remote working have created new requirements for how to securely access what is needed to be productive and successful. Access controls are no different than any other cybersecurity tool – no matter who is using it, they just want it to be invisible and to work seamlessly. That's where we excel. Delinea provides authorization for all identities, controlling access to an organization's most critical hybrid cloud infrastructure and sensitive data.

### ✓ Engineered for seamless security

Maintain and evolve your Privileged Access Management program with greater confidence and achieve higher stakeholder adoption levels. Our PAM solutions are designed to reduce complexity and minimize costs by helping delineate the boundaries of access. Delinea gives users more digital freedom, and gives IT and Security teams more control and greater value in less time.

### ✓ We're accessible at any size

We're a trusted partner to thousands of organizations around the globe – from small businesses to the Fortune 100 – because we make privileged access more accessible for everyone. And we do it while eliminating the need for complex security tools while prioritizing productivity, flexibility, and control.

Whether in the cloud or on-premise, Delinea's solutions are readily customizable, scalable for growth, and powerful enough to secure your organization no matter where it is on its PAM maturity journey.

## Secure Credentials

### Enterprise Vault

Discover, secure, manage, monitor, and audit access to privileged credentials

- Establish a secure vault
- Discover unknown accounts
- Manage Secrets
- Control privileged sessions
- Control Sessions

### DevOps Vault

Protect the secrets that DevOps teams and RPA tools need

- Establish vault
- Centralize Secrets
- Automate & scale
- Issue certifications

### Service Account Lifecycle

Control and manage service account governance

- Establish workflow
- Delegate ownership
- Provision service accounts
- Enforce governance
- Decommission accounts

## Privileged Remote Access

### Remote Admin Access

Privileged remote access for local users

- Establish remote access within the network
- Manage sessions
- Centralize controls
- Record sessions
- Track and audit activity

### Vendor Privileged Access

Privileged remote access for vendors and third parties

- Centralize & manage third party access
- VPN-less & browser-based
- Streamline deployment
- Record sessions Track & audit activity

## Privilege & Entitlement Elevation

### Servers

Enforce least privilege on servers with identity consolidation and MFA at depth

- Consistently enforce least privilege
- Enforce adaptive MFA
- Granular privilege elevation controls
- Host-based auditing & recording

### Workstations

Implement least privilege for workstations

- Windows & Mac
- Manage local accounts
- Elevate user privileges
- Elevate applications
- Improve productivity

### Cloud Infrastructure

Enforce least standing privilege across public clouds

- Continuous discovery of entitlements
- Gain visibility of identities and their access pathways
- Identify the riskiest cloud identities
- Enforce least privilege by right-sizing entitlements

## Protect Identities

### Detect & Remediate Threats

Proactively detect and address identity-related threats

- Continuous detection of identity threats
- Visualization of identity access
- AI-driven risk scoring
- Remediation with recommendations or automation

## Delinea Platform

Seamlessly extend Privileged Access Management to provide just-in-time access with easy, adaptive controls.

- End-to-end visibility
- Dynamic privileges
- Adaptive security
- Cloud-native

## Delinea

Delinea is a leading provider of Privileged Access Management (PAM) solutions for the modern, hybrid enterprise. The Delinea Platform seamlessly extends PAM by providing authorization for all identities, controlling access to an organization's most critical hybrid cloud infrastructure and sensitive data to help reduce risk, ensure compliance, and simplify security. Delinea removes complexity and defines the boundaries of access for thousands of customers worldwide. Our customers range from small businesses to the world's largest financial institutions, intelligence agencies, and critical infrastructure companies. [delinea.com](https://delinea.com)
