## EMA

Value Leader: 2024  
EMA Radar™ for  
Privileged Access  
Management

As organizations continue their digital transformations and move to the cloud, they face increasingly complex environments and an expanding number of identities. This can lead to more challenges in securing identities across an expanded threat landscape. It's not enough to secure identities but also their interactions across the modern enterprise. Identity security is complex, but the solution doesn't have to be. At Delinea we believe the opposite of complex isn't simple — it's seamless.

Delinea is a pioneer in securing identities through centralized authorization, making organizations more secure by seamlessly governing their interactions across the modern enterprise.

We believe every identity should be treated like a privileged user and should have seamless, secure access. Administrators also want authorization controls without excess complexity.

### ✓ A partner for intelligent centralized authorization

Digital transformation, the cloud, and remote working have created new requirements for how to securely access what is needed to be productive and successful. Authorization controls are no different than any other cybersecurity tool — no matter who is using it, they just want it to be invisible and to work seamlessly. That's where we excel. Delinea is pioneering how organizations apply context and intelligence throughout the identity lifecycle across cloud and traditional infrastructure, data, and SaaS applications to eliminate identity-related threats.

### ✓ Engineered for security, reliability, and innovation

Maintain and evolve your identity security program more confidently and accelerate adoption to improve security. Delinea accelerates your teams' adoption by deploying in weeks, not months, and makes them more productive by requiring 90% fewer resources to manage than the nearest competitor. With a guaranteed 99.99% uptime, the Delinea Platform is the most reliable identity security solution available.

### ✓ We're accessible at any size

We're a trusted partner to thousands of organizations around the globe — from small businesses to the Fortune 100 — because we enable you to discover all identities, assign appropriate access levels, detect irregularities, and immediately respond to identity threats in real-time.

Whether in the cloud or on-premise, Delinea's solutions are readily customizable, scalable for growth, and powerful enough to secure your organization no matter where it is on its identity security journey.

## Secure Credentials

### Enterprise Vault

Discover, secure, manage, monitor, and audit access to privileged credentials

- Establish a secure vault
- Discover unknown accounts
- Manage Secrets
- Control privileged sessions
- Control Sessions

### DevOps Vault

Protect the secrets that DevOps teams and RPA tools need

- Establish vault
- Centralize Secrets
- Automate & scale
- Issue certifications

### Service Account Lifecycle

Control and manage service account governance

- Establish workflow
- Delegate ownership
- Provision service accounts
- Enforce governance
- Decommission accounts

## Privileged Remote Access

### Remote Admin Access

Manage and interact with multiple remote sessions in a unified environment

- Establish remote access within the network
- Manage sessions
- Centralize controls
- Record sessions
- Track and audit activity

### VPN-less Browser Sessions

Provide privileged remote access for everyone

- Centralize & manage vendor and third-party access
- Streamline deployment
- Record sessions
- Track & audit activity

## Privilege & Entitlement Elevation

### Servers

Enforce least privilege on servers with identity consolidation and MFA at depth

- Consistently enforce least privilege
- Enforce adaptive MFA
- Granular privilege elevation controls
- Host-based auditing & recording

### Workstations

Implement least privilege for workstations

- Windows & Mac
- Manage local accounts
- Elevate user privileges
- Elevate applications
- Improve productivity

### Cloud Infrastructure

Enforce least standing privilege across public clouds

- Continuous discovery of entitlements
- Gain visibility of identities and their access pathways
- Identify the riskiest cloud identities
- Enforce least privilege by right-sizing entitlements

## Identity Protection

### Detect & Remediate Threats

Proactively detect and address identity-related threats

- Continuous detection of identity threats
- Visualization of identity access
- AI-driven risk scoring
- Remediation with recommendations or automation

## Delinea Platform

Seamlessly extend Privileged Access Management to provide just-in-time access with easy, adaptive controls.

- End-to-end visibility
- Dynamic privileges
- Adaptive security
- Cloud-native
