

Centralized Identity Security

Seamlessly build and apply context across all identities with intelligent authorization

The explosion of siloed security tools, privileged identities—both human and machine—and the rise of shadow AI have made securing access and data across hybrid and multi-cloud environments more complex and unmanageable than ever.

The Delinea Platform is the only cloud-native identity security solution that delivers intelligent, centralized authorization to reduce risk, ensure compliance, and enhance productivity in the era of AI.

✓ Comprehensive visibility

- Increase security with a single line of sight across all identities and the assets they access
- Continuously discover and secure new accounts, changes to privileged accounts, and shadow admins

✓ Usable security

- Minimize friction with easy-to-use solutions that seamlessly integrate into your existing workflows
- Manage your identity security environment with **90% fewer resources**

✓ Simplified compliance

- Enforce data access security with adaptive authorization controls and automated governance
- Prove requirements with unified auditing

✓ Adaptive automation

- Deliver evidence-based access in real-time with AI-driven Intelligent authorization
- Leverage quantifiable AI to dynamically manage privileged access with risk-based analysis

Delinea Platform Benefits

CLOUD AVAILABILITY

99.995% uptime, ensuring a max of 26 minutes of downtime a year (inclusive of any outages on CSPs)

BUSINESS RESILIENCE

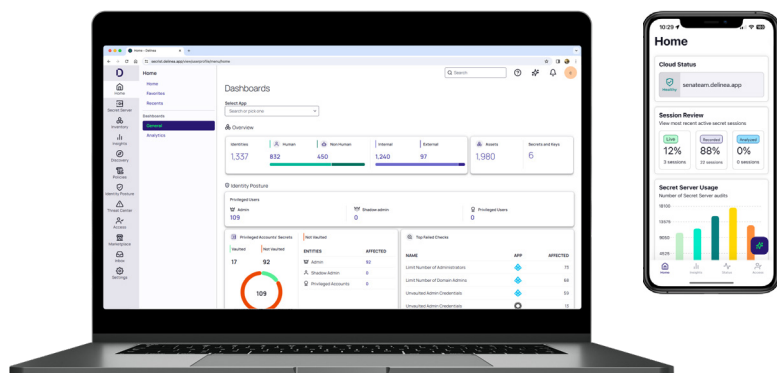

2 minute mean time to recovery with a replicated instance (in a different on-premise location or cloud region – your choice)

FASTEST TIME TO VALUE

30 minute from code to production based on a flexible, microservices-based architecture

The **Delinea Platform** delivers AI-driven, centralized authorization, dynamically managing and remediating access for all identities – human and machine. The cloud-native, holistic platform secures IT, Workforce, Machine/AI, and Developer Identities, protecting you at every interaction while providing fast, quantifiable ROI on your investments.

Delinea simplifies access management, minimizes risk, and maximizes efficiency – without compromising security.

OPTIONS DESIGNED FOR EVERY TYPE OF ORGANIZATION

Secure every identity at every interaction across your entire organization - without sacrificing productivity.

DELINEA PLATFORM

✓ Protect IT administrators

Secure IT Admins from compromise with seamless, centralized authorization to secure and govern credentials and access to systems and data, eliminating gaps in IT admin protection – reducing risk without adding complexity.

DELINEA PLATFORM

✓ Protect machine and AI identities

Protect machine and AI identities across hybrid, multi-cloud infrastructure with centralized, intelligent authorization to discover and control machine and AI identities, manage their access, reduce risk, and ensure continuous protection.

DELINEA PLATFORM

✓ Protect your workforce

Secure your entire workforce with an easy to use, centralized, policy-driven approach that eliminates siloed, manual identity and access management processes, closing security gaps and reducing risk from identity-based threats.

DELINEA PLATFORM

✓ Protect developer productivity

Balance innovation and security by marrying a dynamic, intelligent approach to assigning zero standing privilege with a frictionless experience for developers, reducing risk, without impacting productivity.

Delinea

Delinea is a pioneer in securing identities through centralized authorization, making organizations more secure by seamlessly governing their interactions across modern enterprise. It applies context and intelligence throughout the identity lifecycle, across cloud and traditional infrastructure, data, and SaaS applications to eliminate identity-related threats. Delinea uniquely provides intelligent authorization for all identities, allowing precise user identification, appropriate access assignment, interaction monitoring, and swift response to irregularities. The Delinea Platform accelerates adoption and boosts productivity, deploying in weeks, not months, requiring just 10% of the resources compared to competitors.
