Seamlessly Extending Privileged Access, Everywhere

Manage privileges across all identity types

The expanding number of siloed security tools and human and machine identities, with privileged access, makes it difficult to secure access to critical resources efficiently and effectively. The Delinea Platform enables seamless security with analytics-based access controls and adaptive privilege automation across your data and IT infrastructure, ensuring the right identity has the right access with the right permissions at the right time.

The Delinea Platform is built upon industry-leading Secret Server Cloud to seamlessly extend Privileged Access Management (PAM) to provide just-in-time access with easy, adaptive controls that help IT and security teams reduce risk while enabling growth, efficiency, and scalability.

End-to-end visibility
- Gain visibility into all user, machine, and application permissions, privilege configurations, credentials and relationships.
- Improve efficiency and consistency with a centralized location to manage access privileges.
- Manage all privilege authorizations in a consolidated solution, even as user identities change.

Adaptive security
- Build context around identities and assets, provide attack surface insights to support least standing privilege, and automatically adjust security posture and privilege policies to match your requirements.
- Automatically identify suspicious privilege behavior through machine learning and immediately act to contain breaches and halt intruders by deploying appropriate defense strategies and leveraging machine learning.

Dynamic privilege
- Automatically discover new credentials and identities and apply privileged access policies.
- Remove friction to make it easy for users to adopt new security protocols and processes.
- Enable remote users to access critical resources securely and easily through their browser, no matter where they work, without VPNs, SSH clients, RDP clients, or even remembering passwords.

Cloud-native
- Built in the cloud to scale automatically as needed to support your hybrid multi-cloud environments.
- Add additional PAM capabilities easily, upgrade automatically, and integrate seamlessly with 3rd party solutions.

Delinea Platform Benefits

- **DECREASE RISK**
  - Protect privileged access to tighten your attack surface

- **UNBURDEN IT TEAMS**
  - Control access easily with an intuitive interface and streamlined design

- **CENTRALIZE CONTROL**
  - Manage privileged access and credentials across all identities

- **SCALE YOUR PAM PROGRAM**
  - Deploy elastically within Delinea's secure cloud-native architecture

- **REALIZE FAST ROI**
  - Save time and reduce risk right away with wizard-driven setup and configuration
The Delinea Platform seamlessly extends privileged access, everywhere

Unify privilege management for all identity types so your team can work more efficiently to optimize productivity. Strengthen security and reduce the risk of a breach with activity monitoring, policy automation, and privileged behavior analytics.

The Delinea platform is the next generation of PAM with a unified and comprehensive view of your entire PAM ecosystem. It seamlessly extends PAM across your hybrid multi-cloud infrastructure.

**OBSERVE: End-to-End Visibility**
Discover, vault, and secure access for every type of credential, identity and environment. Identify and access analytics and integrations in one platform across your PAM solutions while reducing friction with seamless access controls and policy updates.

**CONTROL: Dynamic Privileges**
Control privileges across all roles and processes continuously in a single interface. Elevate privileges as needed with governance workflows and flexible, granular rules.

**ADAPT: Extended Security**
Reduces friction to increase adoption by embedding PAM seamlessly into your environment and workflow via analytics-based access controls and centralized policy updates as well as interacting with sessions.

**AN EDITION DESIGNED FOR EVERY TYPE OF ORGANIZATION**
The flexibility and agility to scale PAM security controls on your own terms

**DELINEA PLATFORM Essentials**
Get started by discovering privileged accounts, vaulting and requesting access to secrets, and managing and auditing sessions.

**DELINEA PLATFORM Standard**
Continue your PAM journey by managing remote access, enhancing discovery, implementing MFA enforcement, and granting just-enough privilege on endpoints.

**DELINEA PLATFORM Enterprise**
Extend PAM across your enterprise by governing service and cloud accounts, implementing adaptive MFA enforcement and analytics, and contextualizing just-in-time privilege.

Delinea is a leading provider of Privileged Access Management (PAM) solutions for the modern, hybrid enterprise. The Delinea Platform seamlessly extends PAM by providing authorization for all identities, controlling access to an organization's most critical hybrid cloud infrastructure and sensitive data to help reduce risk, ensure compliance, and simplify security. Delinea removes complexity and defines the boundaries of access for thousands of customers worldwide. Our customers range from small businesses to the world's largest financial institutions, intelligence agencies, and critical infrastructure companies. delinea.com
